CONCIERGE INC · MEET MYA

The whole property management operation.

Everything a management company does — wrapped in software that runs itself, *powered by Mya*.

Demo lead-in · How she works, before you meet her

THE FRONT DESK

Every call answered. Every one.

100%

of incoming calls, texts, and inquiries routed by Mya — day or night, in any language, from day one.

She answers everything.

A fully automated front desk — she takes the call even when it will need a person.

She resolves what she can.

Answers, recommendations, work orders, scheduling — handled on the spot.

She routes the rest.

Assigned team member → Local Concierge → you. Even when it reaches you, she took the call, logged it, and briefed you.

Answering is architecture, not a statistic — she is the front desk, so nothing rings past her.

ONE AGENT, EVERY DEPARTMENT

The org chart you never hired.

The Front Desk

Answers every call, text, and inquiry — 24/7, any language.

The House Expert

Knows everything about your home. Answers in seconds.

The Concierge Desk

Architect of the vacation — recommendations that become revenue.

The Maintenance Line

Work order written, vendor scheduled, follow-up handled.

Guest Relations

Remembers everything a guest tells her — first hello to checkout.

The Back Office

Reports to you on demand — talk or type, she answers.

WHAT SHE DOES

Thirteen things — before you've had coffee.

- Routes every call, text, and inquiry — 24/7, any language
- Knows everything about your home; answers in seconds
- Turns recommendations into revenue — partner offers guests thank you for
- Architects the whole vacation — pre-loaded local knowledge, nearby lookup when needed
- Writes the work order, schedules the vendor, follows up — automatically
- Remembers everything a guest tells her — first hello to checkout
- Talks back to you — ask her anything about your business, out loud
- Delivers your daily brief — status, wins, and approvals
- Teaches you the software as you use it — walks you through every step
- Onboards your home by conversation — you talk, she writes it down
- Syncs your booking platforms — reservations flow in on their own
- Handles lodging tax with a built-in tax engine
- Manages smart locks and access codes for every stay

Everything included, everything automated — and this isn't the whole list. ***It grows every month.***

THE AGENT

There's only one Mya.

An AI agent with a look, a voice, a persona — and a job. Eight agents working under one voice, one name, one company: Concierge Inc.

Patent Pending

Tourism speech-to-speech AI automation.

“Software that talks back.”

Mya™

Trademark application filed. The name your guests will ask for — and your listing will advertise.

A personality you can't copy.

So — what's the 20–30% for?

This isn't property management software.
It's the whole property management operation — and it's yours.

1.5% of your payout. We only get paid when you do.

Extras are à la carte — only pay for what your property uses.

Mya

That's the list.

Now stop taking a document's word for it —

ask her yourself.
